Subject: Centreville Sprayfield Lagoon

Hello Royden,

After our conversation last week about no spraying being performed over the weekend, and, after speaking with David Bramble today, I believe the Town is in a position where it should begin spraying over the weekend to bring down the level in the lagoon. David tells me that the lagoon is at 70% capacity now. That doesn't allow you much storage if the weather turns bad for an extended period.

I don't know the particulars of the Town's arrangement with MES regarding the operation of the sprayfield, but I feel that action should be taken to reduce the potential for a weather-related problem.

Please give me a call if you would like to discuss this matter.

Thank you for your attention.

Dave
